## Experience

### BalloonBox

Vancouver, BC

FULL STACK DEVELOPER

Apr 2022 - Feb 2023

- Architected and led front end development of a Web3 product that successfully launched within a stringent timeline, enabling our client's total staked token amount to grow above US\$800K
- Led project to enable client to demo and market their product offering n-fold by building an extension on top of their existing product architecture
- Led frontend development of B2B platform that allows natural resource consumers (manufacturers) to offset their carbon impact by virtually giving back to communities affected by natural resource extraction
- Tripled user approval rate on client's digital wallet by implementing Plaid and OAuth for wallet authentication
- Reduced project setup up by 75% by building front end code base template and carrying out best practices through strict linting rules
- Mentored junior colleagues through extensive code reviews and pair programming

### KnockNow

Vancouver, BC

WEB DEVELOPER (CONTRACT)

Jan 2022 - Apr 2022

- Led a team of three developers in building and refactoring various features of existing web application
- Oversaw the maintenance of both front end and back end services
- Successfully launched revamped landing site with the support of UI designers

### Ynah Pantig - Freelance

Vancouver, BC
