FULL STACK DEVELOPER

Apr 2022 - Feb 2023

- Led the front end development of a web3 product that successfully launched and having our client's total staked token amount growing above US\$800k in value
- Enabled a client to kickoff a new feature by building a solid proof-of-concept on top of their existing product
- Developed an in-house B2B product that can form a strong socio-economic connection between big businesses and producers of different resources such as rubber
- Tripled user approval rate on a product by implementing Plaid and OAuth for wallet authentication
- Mentored another colleague through code reviews and pair programming
- Reduced project setup up by 75% by building front end code base template and carrying out best practices through strict linting rules
