Multivista

Victoria, BC

FULL STACK DEVELOPER

Jul 2023 - Present

- Spearheaded the integration of Sentry to enhance error detection and resolution, ensuring issues were swiftly addressed to maintain seamless mobile application performance
- Optimized end-to-end testing methodologies using Appium and WebdriverIO for Android and iOS platforms, resulting in a notable 60% increase in workflow efficiency
- Innovated a user-friendly mobile application using React and Cordova, simplifying project management for construction professionals worldwide
- Implemented Git hooks for automated code quality checks, including linting, formatting, and unit testing, reinforcing robust development practices
- Facilitated agile rituals such as stand-ups and retrospectives, fostering team collaboration and continuous process improvement

BalloonBox

Vancouver, BC

FULL STACK DEVELOPER

Apr 2022 - Feb 2023

- Architected and led front-end development of a cutting-edge web3 product that launched successfully under a tight deadline, driving our client's total staked token amount to soar above US\$800K
- Spearheaded the development of a game-changing extension on top of our client's existing product architecture, enabling them to demo and market their offerings in n-fold ways
- Led front-end development of a B2B platform that allows natural resource consumers (manufacturers) to offset their carbon impact by virtually giving back to communities affected by natural resource extraction
- Boosted user approval rate for our client's digital wallet by triple-digit percentage points by implementing Plaid and OAuth for wallet authentication
- Reduced project setup up by 75% by building front end code base template and carrying out best practices through strict linting rules
- Mentored junior colleagues through extensive code reviews and pair programming sessions, helping them to grow their skills and confidence

KnockNow

Vancouver, BC

WEB DEVELOPER (CONTRACT)

Jan 2022 - Apr 2022
